

Edhas Technologies is committed to fostering healthier, stress-free farm animals around the world.

Boost productivity, reduce stress, and enhance animal health with advanced feed supplements powered by Micro-emulsion Technology and natural ingredients to transform livestock care and deliver superior results.

Revolutionize livestock nutrition with science-driven, sustainable products engineered for holistic wellness to deliver unmatched health and performance.

What We Offer:

- ✓ **Natural Feed Supplements**
- ✓ **Holistic Care**
- ✓ **Sustainable Solutions**

Yellow Vet
NATURAL FEED ADDITIVE

YelloVet is an immune-boosting supplement, crafted using cutting-edge, microemulsion technology to enhance the potency of phytochemicals. YelloVet helps strengthen your farm animals' defense mechanisms and reduces stress.

Key Features of Microemulsion Technology:

Nano-Sized Droplets: Microemulsions consist of ultra-small droplets (typically in the 10–100 nm range) dispersed in a liquid medium, enabling better absorption and penetration.

Thermodynamic stability: Unlike conventional emulsions, microemulsions are stable over time and do not separate into different phases.

Self-assembling systems: They form spontaneously when water, oil, surfactant, and a co-surfactant are mixed in the right ratio.

The Fascinating Blend of Ancient Wisdom with Modern Technology

YelloVet supplements, draws inspiration from Herbs such as **Turmeric, Thyme, and Clove**. These supplements are crafted to increase the natural immunity in Farm Animals.

FIELD TRIALS

→ Successful Field Trials

- Conducted across farms in India & USA
- Tested on layer birds, broiler birds, and cattle

→ Key Benefits Observed

- Layer Birds: Enhanced egg quality
- Broiler Birds: Increased meat yield
- Dairy Cows: Improved milk quality

→ Industry Impact

- Proven effectiveness in animal nutrition
- Drives superior outcomes for farmers & livestock industry
- A game-changer in sustainable livestock health and productivity

YelloVet Assures

- Increased egg and milk production
- Cost effective solution for farms
- Low mortality ratio
- Less Disease Infestation
- Reduced stress
- Improved Feed Conversion Ratio
- Reduction in Heat Stroke Mortality
- Enhanced Humoural Immunity
